

Appl. No. : **10/804,811**
Filed : **March 19, 2004**

SUMMARY OF EXAMINER-INITIATED INTERVIEW

On March 9, 2009, Examiner Jason Dunham called Applicants' representative, Ron Schoenbaum, to discuss a possible Examiner's Amendment to place the application in condition for allowance. During the call, Examiner Dunham proposed amending claim 10 by adding the language of dependent claim 37; and proposed changing "when a user accesses" to "responsive to a user accessing" in claim 15. In addition, Examiner Dunham suggested adding language to claim 10 to clarify that the method involves a computing device. Mr. Schoenbaum authorized these changes (including the cancelation of claim 37) by Examiner's Amendment, and also proposed adding two new dependent claims. No prior art was discussed. The Examiner's Amendment included with the Notice of Allowance accurately reflects the agreement reached.
